PROFILE SUMMARY

Aspiring AI Engineer with a strong interest in software development, AI, and problem-solving. Developed a strong foundation in programming, web technologies, machine learning, databases, and problem-solving through academic coursework, hands-on projects, and internships. Eager to apply these skills to building impactful technology solutions.

EDUCATION

Bachelor of Technology (B. Tech) in ***Computer Science and Engineering*** **(AIML)** 2023 – 2027
Gandhi Engineering College, Bhubaneswar CGPA: 9.34

Higher Secondary Certificate (12th Grade) 2022
Council of Higher Secondary Education, Odisha Percentage*:* 73.16%

SKILLS

Programming Languages: Python, SQL
Web Technologies: HTML, CSS, JavaScript, TypeScript, React.js, Next.js
Backend & System Development: FastAPI, RESTful APIs
Databases & Caching: MySQL, PostgreSQL, MongoDB, Redis
Developer Tools & DevOps: Git, GitHub, Docker, Linux
Applied AI / Integrations: GenAI**,** Prompt Engineering, LangChain/LangGraph, RAG

INTERNSHIP

Upskalor Technologies LLP, Junior Developer Intern June 2026 – August 2026
Developed scalable backend solutions for real-world client projects by translating business requirements into functional code. Gained hands-on experience in software engineering and practical industry skills while working in a fast-paced, collaborative team environment.

Edunet Foundation, AI Intern June 2025 – July 2025
Completed a virtual internship focused on AI and Azure technologies, gaining hands-on experience in developing AI applications and understanding real-world deployment practices.

PROJECTS

Resume Analyzer + Interview Coach:
Technologies: Next.js, MongoDB, OpenAI API, REST APIs
Developed an AI-powered resume analysis and interview preparation platform that reviews resume, provides ATS-friendly improvement suggestions, generates role-specific interview questions, and delivers personalized feedback to enhance job readiness.

AI-Powered Smart Agriculture Monitoring System:
Technologies: Next.js, MongoDB, FastAPI, AI/ML
Developed an AI-powered agriculture platform for crop disease detection, weather-based planning, soil and crop recommendations, smart irrigation, and multilingual farmer support.

ACHIEVEMENTS

- First Place Winner — GEC Hackathon 2026.
- Finalist / Active Participant: Smart India Hackathon (SIH), GDG HackFest, and BPUT Hackathon.
